

# Direct-to-Object Digital Inkjet:

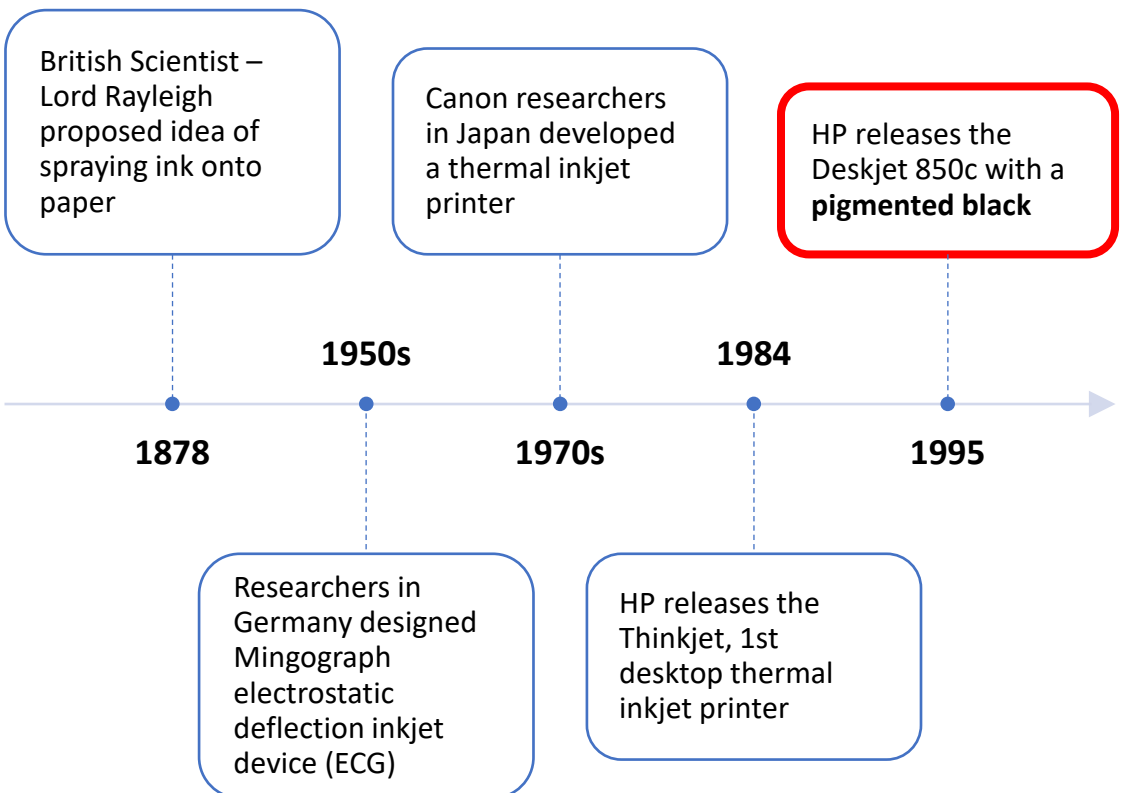

## Process Advantages and Limitations

Terry Clayton PhD  
Summit Analytical

## A Little History...

# Fried Eggs

# Fried Eggs in the Microwave

---

1. Crack two eggs into bowl.
2. Pierce the yolks with a fork/toothpick.
3. Add a pinch of salt/pepper to taste.
4. Cover the dish leaving a small vent.
5. Microwave on high for 40 seconds.
6. Let stand one minute.
7. Serve with toast.
8. Note:
  - a. 600-800w – More time
  - b. 900-1100w – Average
  - c. 1200-1300w – Less time

## Outlook – Rising Stars

---

- Packaging
- Textiles
- Direct-to-Object

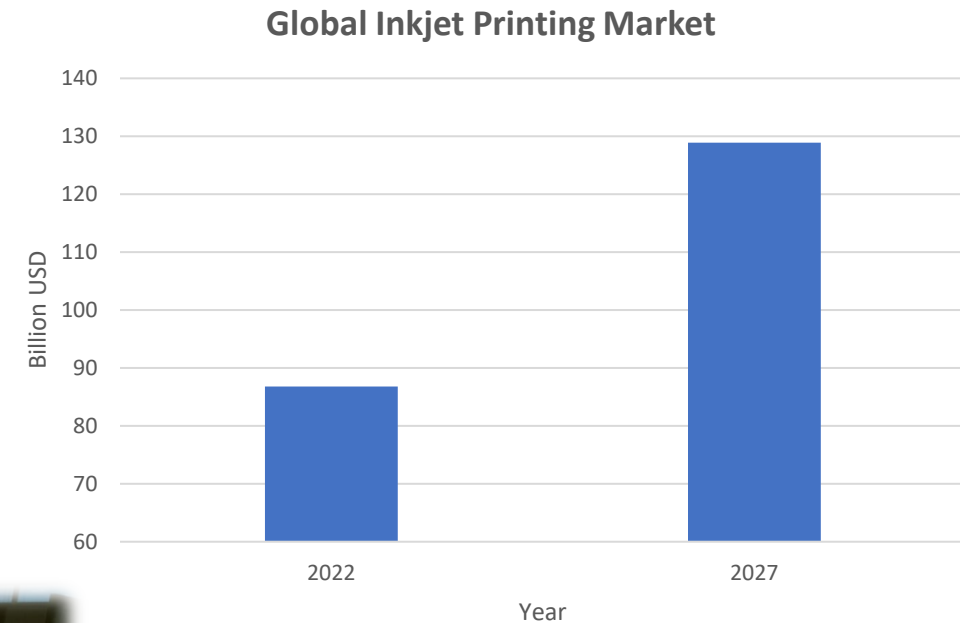

# Global Inkjet Printing Market

- 2023 will likely be another year of recovery. The global market for inkjet printing is expected to grow from \$86.8 billion in 2022 to \$128.9 billion in 2027. A CAGR of 8.2%

- **Major Growth Applications**

- Corrugated
- Carton board
- Flexible substrates

[The Future of Corrugated Production | Industrial Print Magazine](#)

Smitthers

# Corrugated Packaging

- 176B Output Opportunity
- <1% Corrugated is digital today
- Ink cost is a barrier
- Automation
- Open ink systems
- Kento Hybrid

# Digital Textile Market

Global digital textile market is expected to grow from USD 2.67 billion in 2022 to USD 7.83 billion in 2030. A compound annual growth rate of 14.4%.

Dye sublimation and pigment are the fastest growing segments respectively. Digital inkjet textile printing Ink market was estimated at \$900 million in 2021 and is predicted to grow at a CAGR of ~20%

through 2027.

*Today, digital represents around 5% of all textiles printed.*

Global Digital Inkjet Textile Market

# Direct to Shape

- Globally, the revenue generated by the direct-to-shape inkjet printer market has been estimated to be around US\$ 3.8Bn in 2022 and is projected to increase at a CAGR of 7.2%.
- Many internal production systems
- Compelling demand to 'personalize' product has driven inkjet implementation
- *Market penetration <5%.*

# Bottled Goose, UK

- 3 Inkcups Helix
- Personalized Drinkware
- 6 PPM
- Plans to scale, be in stores
- 1- 10,000's minimums

1. T-shirts
2. Drinkware
3. Polos
4. Caps/headware
5. Bags
6. Wearable - non shirt
7. Writing instruments

# Top Promotional Items in 2022

[Infographic: Top Promotional Product Categories 2022 \(asicentral.com\)](https://www.asicentral.com)

## Digital (Inkjet) Technology Delivers Many Benefits

- The benefits of an inkjet process
  - Rapid fulfilment - 'Amazon Generation'
  - Mass customisation possible
  - Lower inventory – make/finish on demand
  - Responsive to consumer buying patterns
  - Less materials consumption – 'greener' technology
  - Non-contact
- **Benefits are application-specific**

# The Business Model

- a. Choosing a target market
- b. Understanding the whole product “specification”**
- c. Positioning the product
- d. Building a marketing strategy
- e. Selecting appropriate distribution channel
- f. Deciding the proper pricing

# Ceramic Tile Industry Revolutionised by Inkjet

- Traditional method – rotary screen
  - Changeover 1-2 days, \$30-50K
  - 2-3 week run required to recoup set-up
  - Textured tiles difficult to print
  - 20-50% of ink is wasted
  - Significant breakage during print (10%+)
- Inkjet advantages
  - Reduction in set-up costs
  - Instant job changes, short runs, one-offs
  - Reduced inventories, shipping costs
  - Improved image quality, **less breakage**
  - Print uneven surfaces and over the edges

# Speed

---

Stolle Decorator: 2,200 cans/min

Hinterkopf D240: 240 cans/min

*"Real productivity depends on uptime..."*

# Reliability

- i. Productivity
- ii. Uptime
- iii. Daily maintenance
- iv. Open time
- v. Sustainability

---

# Environment

- Specifications:
  - Temperature: 68° - 86°F
  - Humidity: 40% – 80%
    - static
  - Humidity: 60%-80%

# Environment

- Specifications:
  - Temperature: 68° - 86°F
  - Humidity: 40% – 80%
  - Humidity 60-80%
  - **No Particulates**

No Flow

Low Flow

## Climate Control in the Print Zone

- Temperature Control
- Humidity Control
- Particulate Control

## The Environment: Plant

- Temperature
- Humidity
- Particulates
- Temp & stability, AC- rust
- Humidity >50%
- Cleanliness/dust - printheads
- Exhaust
- Compressed air, pressure volume
- Power
- Network
- Stray light
- Space
- Storage for media pre/post print
- Floor
- Water chiller
- Static bars
- Room to move
- Keep printer level

# Substrate

- Warp
- Dog ears
- Absorption
- Adhesion
- Dot gain
- Feeders/manual
- Coatings
- Primer
- Porosity/hold down
- Heat sensitivity
- Treat

*"Just raise the carriage..."*

# Print Gap - Misting and Overspray

---

**Ink overspray**

**Print Gap 1.5mm-2mm**

# What's Happening to Satellites and Mist?

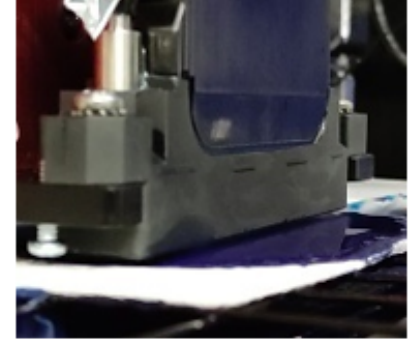

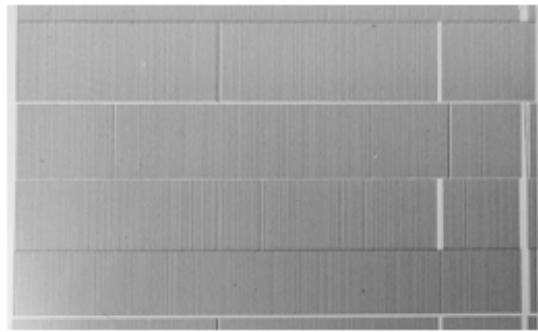

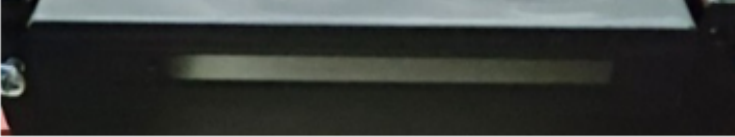

- Will they make it to substrate?
- $\leq 5$  pL drops carried by eddy currents, carriage turbulence
- Tall Gap
- Nozzle plate accumulation

# Reliability testing of new fluids

Example tests:

- Drive Voltage vs. Temperature
- Drive Voltage vs. Ink (Meniscus) Pressure
- Drive Voltage vs. Pulse Shape
- Drive Voltage vs. Print Frequency (Pulse Freq.)

Test Description	Set-up Photo	Print Test Result	Print Head Appearance
High Gap			
Lower Gap			

# Ricoh MH5320 (Gen6)

---

## High-definition and High-productivity

A minimized 5pl droplet size and improved jetting accuracy yields excellent print quality without graininess. With 1,280 nozzles configured in 4 x 150dpi rows, this head achieves high-resolution 600dpi printing. Greyscale features a maximum frequency of 50kHz, allowing for increased productivity.

RICOH MH5320 (two color model)
